# AMPRNet IP Coordination Germany

The German ⊙ AMPRNet[tm] IP-Coordination is a working group which has been elected by the community of all german radioamateurs. It works in a kind of „**A**MPRNet **N**ational **I**P **R**egistry (**ANIR**)" for the german parts of the worldwide TCP/IP-network for Radio-Amateurs, also called NET-44 or AMPRNet[tm]. DL-IP-Coordination Germany is supported by regional maintainers in a kind of „**A**MPRNet **R**egional **I**P **R**egistry (**ARIR**)". In many german sub-regions these guys are the responsible persons for any questions, problems and requests from radioamateurs out of those sub-regions concerning participation in the NET-44. **ARIRs** can manage their submitted IP-ressources independantly within the region they are responsible for.

Overview

Quick Links

HAMNET - services, structure, AS-Numbers, BGP and more
HAMCLOUD - services, structure, integration into HAMNET
IPKOORD - history, organisation, tasks and activities round about our team
MEETINGS - meetings, lectures, documents from DL-IP-Coordination
SERVICES - what we can do for you
IMPRESSUM - privacy policy and all such stuff

miscellanous

[**ARCHIVE**](#) - Some old stuff that's worth being preserved.
