

# AMPRNet IP Coordination Germany

The German [AMPRNet](#) IP-Coordination is a working group which has been elected by the Community of all German Radioamateurs. It works in a kind of „**AMPRNet National IP Registry (ANIR)**“ for the german parts of the worldwide TCP/IP-network for Radio-Amateurs, also called NET-44 or AMPRNet. DL-IP-Coordination Germany is supported by regional IP-Coordinators in a kind of „**AMPRNet Regional IP Registry (ARIR)**“. In many german sub-regions these guys are the responsible persons for any questions, problems and requests from Radioamateurs out of those sub-regions concerning participation in the NET-44. **ARIRs** can manage their submitted IP-ressources independantly within the region they are responsible for.

## Tasks and Services

DL-IP-Coordination Germany develops and maintains some essential Services for the German part of the AMPRNet:

- Assigning [AS-numbers](#) ([BGP](#)-routing) for the german [HAMNET](#) in conciliation with adjacent European Countries
- Maintaining a [WHOIS](#)-server for the HamRadio-services for internal documentation and information about all German networks in HAMNET. HamCloud, IPIP-mesh etc
- [Assigning](#) of IP-networks to the [AS-numbers](#) in the German [HAMNET](#) and registering those entries in „ampr.org“
- [Assigning](#) of IP-addresses in the german networks and registering them in the „ampr.org“ domain
- Organizing and maintaining a german-wide concept of [regional zones](#) with „de.ampr.org“ sub-domain
- Maintaining 3 main DNS-servers as ([DNS-Hubs](#)) for HAMNET with mirrors in HamCloud (*located at universities of Duisburg-Essen, Dresden and Nuremberg*)
- Developing and submitting software for [synchronization](#) and plugging regional DNS-servers to the national [DNS-hubs](#)
- Developing and maintaining automatic [updates](#) to the wordlwide DNS-servers for the domain „ampr.org“
- Developing and submitting of [publications](#) about technical realisation of ip-coordination in Germany
- Holding [presentations](#) about technical solutions for coordination of ip-networks during meetings

and exhibitions

- Supporting the regional maintainers and admins in the local autonomous systems (AS)
- Planing and realization of innovative concepts (e.g. „anycast“ in amateur-radio-networks etc)
- Tight cooperation with the maintainers of the international non-profit-domain [ampr.org](http://ampr.org)
- Providing/maintaining one of the authoritative DNS-servers for the worldwide AMPR.ORG domain ([ampr-dns.in-berlin.de](http://ampr-dns.in-berlin.de) hosted by [BCIX Berlin](#) at [Individual Network e.V](#))
