

# AMPRNet IP Coordination Germany

The German  **AMPRNet™** IP-Coordination is a working group which has been elected by the community of all german radioamateurs. It works in a kind of „**AMPRNet National IP Registry (ANIR)**“ for the german parts of the worldwide TCP/IP-network for Radio-Amateurs, also called NET-44 or **AMPRNet™**. DL-IP-Coordination Germany is supported by regional maintainers in a kind of „**AMPRNet Regional IP Registry (ARIR)**“. In many german sub-regions these guys are the responsible persons for any questions, problems and requests from radioamateurs out of those sub-regions concerning participation in the NET-44. **ARIRs** can manage their submitted IP-ressources independantly within the region they are responsible for.

## Overview

## Quick Links

**HAMNET** - services, structure, AS-Numbers, BGP and more

**HAMCLOUD** - services, structure, integration into HAMNET

**IPKOORD** - history, organisation, tasks and activities round about our team
